

THERMON

HEAT TRACE SYSTEMS

Heat Trace That Works Smarter. Installs Faster. Lasts Longer.

Thermon delivers industry-leading heat trace systems engineered for performance, reliability, and unmatched installation convenience. With superior cable construction and the most advanced accessory kits on the market, Thermon makes installations faster, safer, and more cost-effective—time after time.

BSX Self-Regulating Heater Cable

Thermon's #1 selling cable - durability, flexibility, and top-tier quality matching competitors at flat, simplified pricing across all wattages.

- Equivalent quality to Competitor 1, the industry benchmark
- Outperforms Competitor 2 — fewer field failures
- Extremely easy strippability for faster prep
- Available in 5W, 8W, 10W at 120V or 240V
- Flat price per foot — unlike competitor's tiered pricing

Feature	Thermon	Competitor 1	Competitor 2
Cable Quality	✓ Premium	✓ Premium	X Lower
Pricing Model	✓ Flat / Foot	X Tiered	Varies
Strippability	✓ Excellent	Good	Average
Field Failures	✓ Very Low	Low	X Higher
Wattage Options	5W, 8W, 10W	Multiple	Limited

Reliable Performance

THE THERMON ADVANTAGE: TERMINATOR ACCESSORY KITS

Modular, tool-less, installer-favorite accessory kits that reduce labor time and field errors on every job, Thermon's kits are widely considered the best on the market.

1. Modular Base System

One base supports starter, splice, and end kits. Change configurations without removing insulation or reinstalling hardware.

2. Tool-less Twist-Lock

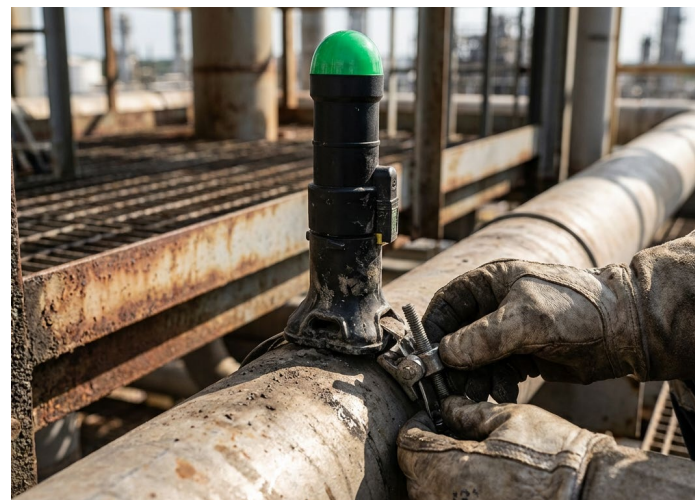

No screws to drop or lose. Faster assembly. Cleaner, more consistent field installs every time.

3. Pipe Straps Included

Every kit includes the required pipe band inside the box. Competitors charge extra and require separate ordering.

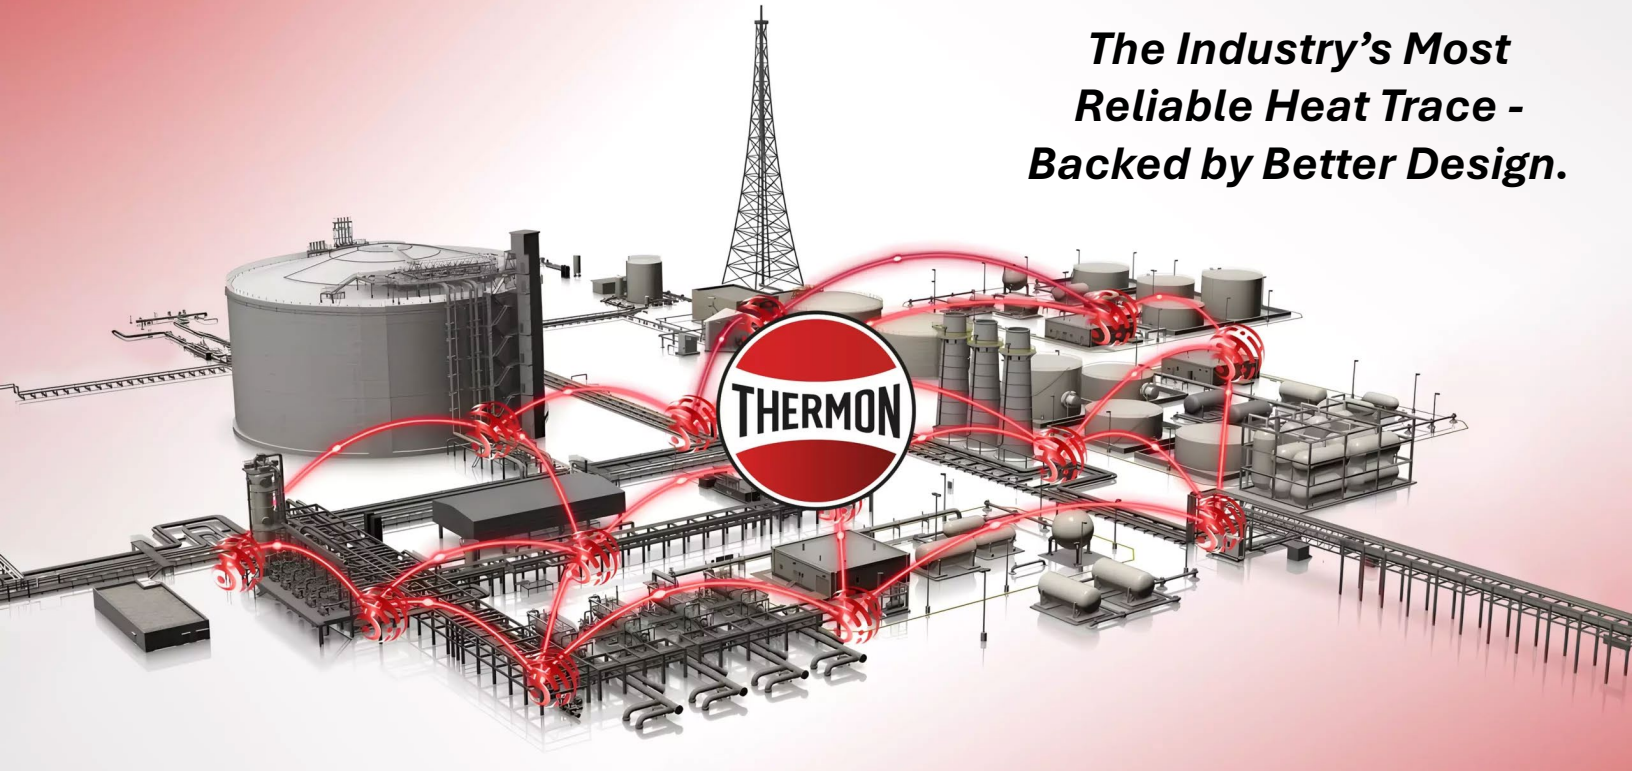

4. Best-in-Class Lighted End Kit

360° dome-top indicator. Free-floating module prevents cable twisting. Bright green LED — visible in daylight, universally understood.

Less labor. Fewer field errors. Better visibility. Greater safety.

**The Industry's Most
Reliable Heat Trace -
Backed by Better Design.**

Installer's Choice

Electricians who try Thermon stick with it. Faster setup, fewer SKUs, cleaner installs, easier troubleshooting.

- Faster installation time
- Fewer components to manage
- Clearer troubleshooting through better indicator lights
- More versatile kits = fewer SKUs on the truck
- Less room for installation mistakes

3 → 1

One Thermon DP kit replaces three competitor SKUs (single starter, multi starter, splice)

Includes all necessary hardware for every install — no missing parts

Flat cable pricing eliminates quote complexity and saves time

Thermon combines top-tier cable quality with the industry's most intuitive, modular, installer-friendly accessory kits—creating a heat trace solution that delivers long-term reliability, lower installation costs, and a better user experience on every job.
